

TORNADOES STRIKE GARLAND AND OTHER TOWNS; SEVERAL DIE

TWISTER RIPPED THROUGH SECTION NORTH TEXAS EARLY MONDAY

By Associated Press.

Dallas, Texas, May 9.—Two tornadoes which struck Northwest Texas before dawn today caused the deaths of at least 32 persons and serious injury to fifty or more, and property damage estimated by some as high as \$1,000,000. The death list shortly after noon stood, sixteen at Nevada, 10 at Garland, four near Wolfe City, and two near Kellogg. The same storm which wrecked Nevada evidently hit near Kellogg and Wolfe City, as the damage to the latter places occurred shortly after Nevada suffered.

Another storm struck Garland about an hour later. This one apparently hit again in Lamar county at Tigertown, near Paris, where several were hurt.

Three Towns Hard Hit.

Garland, Nevada and Tigertown, were the worst damaged. Practically the entire town of Nevada with a population of 200, was wiped away. All but three of the 15 residences in Tigertown were damaged or demolished.

Garland was hit between 3 and 4 o'clock, by a roaring twister which passed high over Dallas at 3:30 o'clock with a rumble which resembled continuous but distant thunder. Reports from Nevada said that town was struck before 3 a. m. The same storm which damaged Garland apparently was the one which hit Tigertown as that village suffered about 4 o'clock.

Were Trapped in Bed.

At both Garland and Nevada those killed and injured most seriously were trapped in their beds as the walls of their homes were ripped away and roofs crashed onto

MUCH CLOTHING IS FORWARDED TO FLOOD VICTIMS

Mrs. J. D. Jackson, who is in charge of the clothing shipments of the Red Cross for the flood stricken district, reports that over fifty large sacks and some five hundred boxes of wearing apparel have been forwarded to the Red Cross headquarters for distribution.

More clothing is needed and Mrs. Jackson states she will continue forwarding the clothes so long as the people will continue their donations.

That the tolls at Garland were as little as they were was due to the fact that wind hit the north edge of the town only, and lifted as it reached the northern rim of the business district. While the several blocks hit were left a mass of twisted debris and kindling the part of the town was not thickly built up.

The storm went east from Nevada and was reported to have wrecked some 15 or 20 farm buildings before it hit a small community known as Cowskin, where several persons were injured but none killed according to all available reports. The storm veered over or around Josephine.

Injured Taken to Hospitals.

The more seriously injured were taken from Garland to Dallas and from Nevada to Greenville and McKinney. Some were hurt so badly their deaths were expected.

The tornadoes were preceded by electrical storms, heavy rains and gusty winds, at various times during the night.

The heaviest rain reported to the weather bureau was at McKinney where there were three inches. Only a small amount of rain fell at Fort Worth. It was less than 2 inches at Dallas.

By Associated Press.

Dallas, Texas, May 9.—Ten persons are reported to have been killed and several injured in the

APPROPRIATIONS AND SPECIAL SUBJECTS TO OCCUPY LAWMAKERS

SENATOR POLLARD OF TYLER NAMED PRESIDENT PRO TEM OF SENATE

By Associated Press.

Austin, Texas, May 9.—The special session of the Fortieth Legislature got under way today at noon under call of Governor Dan Moody to pass the two-year appropriations of some \$40,000,000, enact highway and civil service laws and consider whatever else he submits.

Senator Tom Pollard of Tyler was elected president pro-tem of the Senate, succeeding Senator A. E. Wood of Granger.

Greeting the House, Speaker R. L. Bobbitt of Laredo expressed hope that all business can be completed in thirty days.

One hundred and thirteen House members and 28 Senators answered the roll call.

Governor Moody indicated that his message probably will not be sent to the respective houses until Tuesday. It is expected to contain references to the other subjects included in his call for the session—state civil service, highway legislation, "and such other matters as the executive may see fit to submit."

Passage Stevenson Bill Is Necessary

By Associated Press.

Austin, Texas, May 9.—Adoption of the Stevenson proposed constitutional amendment providing for separation of objects of state and county taxes is essential if the new state tax survey commission is to make progress, its members agreed in organization meeting here today.

Former Governor O. B. Colquitt of Dallas was elected, permanent chairman over Senator Edgar Witt of Waco and Representative Claude Teer, of Granger was chosen secretary.

Governor Moody in a speech told the commission of the present

MRS. MAGGIE MILLER PASSED AWAY SUNDAY AT AN EARLY HOUR

SERVICES FOR WELL KNOWN CORSICANA WOMAN SUN- DAY AFTERNOON

By Associated Press.

Mrs. Maggie Miller, aged 58 years, 9 months and 5 days, wife of Lanty Miller, died at the family residence Sunday morning at 3 o'clock, following an illness of four months, and the funeral services were held at the First Methodist church Sunday afternoon at 5 o'clock with interment in Oakwood cemetery. The services were conducted by Rev. F. P. Culver, pastor of the First Methodist church.

Mrs. Miller is a native Texan, being born in Henderson county, June 4, 1868, but moving to Navarro county when a small child. She was married to Mr. Miller in 1886.

Surviving are her husband and seven children: Mrs. Dodge C. Hogan, Pharr, Texas; Vaughn Miller, San Angelo; Mrs. Lois Pope, Corsicana; Mrs. Edward P. Zinke, Corsicana; Mrs. Gordon W. Williams, Corsicana; Mrs. Carl C. Boysden, Pharr; Gene L. Miller, Corsicana, and a number of grandchildren.

Mrs. Miller had been a member of the Methodist church for many years.

Burialbearers were L. J. Woods, L. O. Harrison, C. B. Haley, C. R. Stealy, R. P. Bates, L. J. Sheppard, N. L. Benson and George Whyte.

"chattie" condition of tax estimates explaining it was established when practically all property in the state was visible. He commented on the state's present financial condition saying he believes prospective revenue will be sufficient without levying additional taxes. Colquitt and others stressed need for the passage of the Stevenson measure, which will be submitted to representatives on the first Monday in August.

"Corsicana Has It."

WOMAN IS LIKENED UNTO A POISONOUS SERPENT AND MAN BRANDED AS DESPICABLE

WATERS PILING UP AGAINST BAYOU DIKE MAY BREAK THROUGH

By Associated Press.

New Orleans, May 9.—High winds which sent greedy waves gnawing at the earthen embankments protecting South Central Louisiana from an angry Mississippi today increased the hazard against which an army of men was fighting along a far-flung levee front.

Hundreds of men guarded the ramparts and the slightest indication of weakness brought reinforcements on the double quick to plug sand bags into position and rear protecting reinforcements. A sand hill developed in the levees on the East side of the river near Baton Rouge, but quick work averted the danger of a break.

While the high winds increased the peril along the main Mississippi levee front, danger of a break there was not believed imminent. Above Baton Rouge, along Bayou Des Galles, where the levees are encountering the crest of the inland lake, pushing down from breaches in the embankments along the Mississippi and Arkansas, a break was declared inevitable.

The crest of the flood had been lost by observing experts. Apparently, they said, it was somewhere in the surging sea which covers Northeast Louisiana. The river at Baton Rouge remained stationary, although a rise of 1 of a foot was shown at Donaldsonville, between that point and New Orleans.

The work of widening the breach at Poydras continued with the river still remaining stationary at the Crescent City. Almost 18,000 refugees from Northeast Louisiana were being cared for at Monroeville, with an estimated 8,000 more from Louisiana adding to the flood population of Vicksburg and Natchez concentration camps.

By Associated Press.

New Orleans, May 9.—The "Sugar Bowl" of Central Louisiana was threatened today as the flood waters of the Mississippi river surging from six dike crevasses in the northeastern part of the state piled up against the Bayou Des Galles levee seeking an outlet to the sea. A funnel-shaped stream covering thousands of square miles of the Delta of Northeast Louisiana poured its strength into the back water that already subjected the Bayou Des Galles levee to an enormous pressure. Federal and state engineers feared the dike could not hold.

Hundreds of men were working on the crest of the levee. Engineers concentrated their forces at weak spots, while a rescue fleet consisting of many types of vessels was being mobilized to meet any emergency.

The "Sugar Bowl" wherein the domestic sugar cane is grown, is thickly populated. It is estimated that 250,000 persons might be driven from their homes by a crevasse at Bayou Des Galles. Four million acres would be subject to overflow.

Unless the dikes break, the waters will be diverted through Old River back into the Mississippi, adding to the already record-breaking flood that is moving down the Father of Waters. That would increase the strain against the levees south of Angola. Tauntness of battle lines on the lower side contrasted sharply with the Northeast Louisiana line, where the battle is over and the river has triumphantly crashed through the dikes at six points, inundating practically all of that part of the state, while the flood continued to rise in the central and southern portions of the flooded area. From the extreme north came reports of a fall and it was believed the end was in sight.

The crest was lost somewhere in the great lake created by the crevasses, but it was said that unless there was a crevasse at Bayou Des Galles, it would be at the mouth of Old River within a few days. Movement of the peak of the rise will be a matter of speculation.

North from Old River, gauges all along the lines showed steady declines, while to the south each tenth of a foot the water climbed marked a new record.

Killed By Elevator.

Fort Worth, Texas, May 9.—E. B. Campbell, an ornamental iron worker was killed Monday when struck by a descending elevator in a hotel building under construction.

By Associated Press.

New York, May 9.—Summations were completed at the Snyder murder trial today. It was expected the case would go to the jury before night.

District Attorney Newcombe told the jurors that just several weeks ago "a most atrocious" murder had been committed in Queens Village.

"All paths led to the Defendant Snyder and the Defendant Gray. Without malice, without any personal feeling at all, this man and this woman have been brought to the bar of justice."

He outlined the two-year intimacy of the defendants and spoke of insurance he said had been placed on Albert Snyder's life without his knowledge.

"They wanted that insurance," he shouted, "and they took the only course they could think of to an attempt to get it."

Newcombe stressed the admitted fact that Mrs. Snyder left two doors unlocked on March 19, as the Gray could enter.

"Is that an act of innocence?" he asked.

The prosecutor asserted that Gray was drunk neither before nor during the killing.

By Associated Press.

New York, May 9.—Mrs. Ruth Snyder was likened to a "poisonous serpent" who drew Judd Gray into her glistening coils so that he could not escape, in the summation of Gray's case today.

"I am going to plead to you," William Millard told the jury "just as though Judd Gray was my boy, because I believe in him."

He then outlined Gray's home background during his youth, the care his mother gave him, his church affiliations.

Millard pictured the bright future which spread out before Gray as he became a success in business, married and had a daughter. "Then, suddenly," he said, "in 1925, a sinister, fascinating, unscrupulous woman came across his path. What catastrophe that those two should have met."

"I would not blacken any woman's name if I could help, but you must have the truth."

Woman Like Poisonous Serpent. "That woman, like a poisonous serpent, drew Judd Gray into her glistening coils and there was no escape."

Millard told the jury that Gray had no motive for the murder, whereas Mrs. Snyder, if her plan went through, got \$95,000 insurance.

Millard spoke for one hour and 38 minutes.

Dana Wallace, for Mrs. Snyder, told the jury that "this is a case of the people of New York and Henry Judd Gray against Ruth Snyder."

Gray Severely Scored. "And Henry Judd Gray," he said, "is the most despicable creature that I have ever seen. Ruth Snyder has been put in a position by this double prosecution that is extremely unfair."

Wallace read from the opening statement for Gray in which it was said his confession was untrue and was obtained under duress.

"Why then," he shouted, "if that was what they meant to do, did Gray get on the stand and say the confession was voluntary and true? Was Gray lying to us or had he lied to his own lawyer? Which is the more likely?"

Gray Was Intended Victim.

By Associated Press.

New York, May 9.—Counsel for Henry Judd Gray charged in court today that Mrs. Ruth Snyder had planned to poison Gray on the same night as her husband was killed.

Only Gray's steady drinking of whiskey, the lawyer said, saved him. He also asserted that Gray never struck Albert Snyder with the sash weight.

"He struck at him but missed," the lawyer said, "and the blows that stunned Snyder were all delivered by a woman, Mrs. Ruth Snyder."

MORE TEXAS RADIO BROADCAST PLANTS GRANTED LICENSES

By Associated Press.

Washington, May 9.—An additional list of sixty-one radio broadcasting stations which have been granted temporary permits to continue service was made public today by the Federal Radio Commission. With call letters and meter wave length assignments, the stations licensed today included: KFKR, Oklahoma City, 214.2; KGDO, Dallas, 235; KFRB, Beeville, 248; KFYJ, Houston, 238; KFLX, Galveston, 239.8.

NOT TOO LATE TO PLANT FEED CROPS SAYS AGRONOMIST

Special to the Sun.

College Station, Texas, May 9. There is still plenty of time to plant feed crops wherever the continued wet weather this spring prevented the planting of corn at the usual time, advises E. A. Miller, Agronomist for the Extension Service of the A. & M. College of Texas. He further states that during years of low priced cotton, it is even more important than ever to raise sufficient feed and that every effort should be made to raise all the feed that is needed.

Such crops as grain sorghum, including Foteria, Milo, Hegari, Kafir and Darso may be sown as late as July, as emergency crops to take the place of corn. Even quickly maturing varieties of corn, such as the Sure-cropper type and June corn may still be planted.

To guard against blasting of grain sorghum heads by the sorghum midge, pure type seed should be used on account of the uniformity in heading; all heads which form before the main crop should be cut off. The seed should also be planted at least 200 yards away from sweet sorghum, and Johnson grass should be kept down.

Sudan grass, Red Top sorghum, cow peas and millet are other good feed crops to grow. Sudan grass furnishes excellent grazing when planted in 2 ft. rows at the rate of 10 to 15 lbs. per acre and will be ready to cut for hay in from 6 to 8 weeks. A good combination is Sudan grass for grazing and Red Top sorghum for hay.

Millet such as German millet is also a quick maturing crop and is fairly drought resistant. Millet should be cut for hay right after blooming and should not be allowed to go to seed, especially when it is to be fed to horses and mules. It is best to sow the seed broadcast at the rate of about 30 lbs. per acre.

More cow peas should be grown, as they make excellent hay when properly cured, being almost equal to alfalfa in feed value. They can also be used for grazing or be plowed under for building up soil fertility. Some of the best varieties are the Great New Era, Druggan, Whip-Poor-Will and Chinese Red. The black-eye pea is a good variety for table use. Soy beans and Mung beans are also good summer legumes, but unfortunately Soy beans are often badly damaged by rabbits, as rabbits are very fond of these young plants. Mung beans are valuable because they can stand a great deal of dry weather. Velvet beans are recommended only for East Texas and they require a good deal of summer rain.

COTTON BELT ACTIVE TO PREVENT DISEASE IN FLOODED AREAS

Special to the Sun.

Tyler, Texas, May 9.—Sanitary measures designed to protect the employees and to prevent further outbreaks of disease affecting citizens in the flooded areas along the St. Louis Southwestern Railway Lines are now well under way. The entire personnel of the sanitary engineering department, under the direction of H. W. Van Hovenberg, sanitary engineer, has been concentrated at Pine Bluff, Arkansas, which, on account of its central location, has been selected as working headquarters of the staff.

Mr. Van Hovenberg and Dr. A. E. Chace, chief surgeon of the Cotton Belt Route, have been directed by President Daniel Upthegrove to devote all their energies and resources to sanitation and health work during the present emergency.

Among the supplies forwarded to Pine Bluff to meet urgent requirements are one thousand typhoid vaccine treatments for the benefit of persons compelled to drink water which might contain typhoid germs, forty thousand quinine capsules, 500 tubes of chlorine for the sterilization of water—each tube containing a sufficient quantity to treat 1,000 gallons—and disinfectants for bunk cars in the flooded areas.

Posters have been placed in stations warning travelers of the danger of typhoid, small pox and malaria caused by the flooded waters, and the railroad has provided an exhibit car in which is placed malaria and typhoid displays to educate the traveling public in this section how to prevent and to properly treat these diseases.

Austria Denounces Commercial Treaty

By Associated Press.

Vienna, May 9.—Austria and Czechoslovakia have broken off negotiations for a new commercial treaty and Austria has denounced the old arrangement as of April 15.

This automatically increases import duties on Czechoslovakia goods 150 per cent, which is unlikely to continue long as the two countries are dependent on each other. Austria, for the moment, will benefit in one way, as her imports from Czechoslovakia are responsible for her adverse trade balance.

ENTIRE BUILDING TO BE OCCUPIED BY JEWELRY STORE

SAM DAICHES WILL INSTALL NEW FIXTURES AND EQUIPMENT

Announcement has been made that the Corsicana Jewelry and Optical Company will occupy the entire building of the present location and in the future the business will be known as Sam Daiches, Jeweler and Optometrist. Sam Daiches is the proprietor.

New fixtures will be installed in the building at an early date and several thousand dollars will be spent for improvements. When these improvements are completed the jewelry store will be one of the most modern and up-to-date in the state and will be a credit to a city many times the population of Corsicana.

All new equipment will be installed in the optical department and Mr. Daiches, who is a registered optometrist, will feature this department of his business.

Mr. Daiches' connection with two jewelry stores in Laredo, two in Brownsville and one in Albany, Texas, gives him increased buying opportunities which he states will be reflected in the reasonable prices of his high class wares carried in stock. Mr. Daiches states he will make a trip to the east at an early date for the purpose of purchasing an entirely new stock for his store and that no expense will be spared in keeping his stock up to the minute at all times.

Mr. Daiches came to Corsicana in 1917 from Laredo and opened a small place of business at 111 South Beaton street. His patronage grew so steadily that he soon outgrew these quarters and he moved to his present location, 104 South Beaton street, where he occupied half of the building for a number of years. Now the further growth of the business made additional floor space necessary.

Mr. Daiches has made many friends in Corsicana during his residence here. He is progressive and always identifies himself with any move whereby the community is to be benefited.

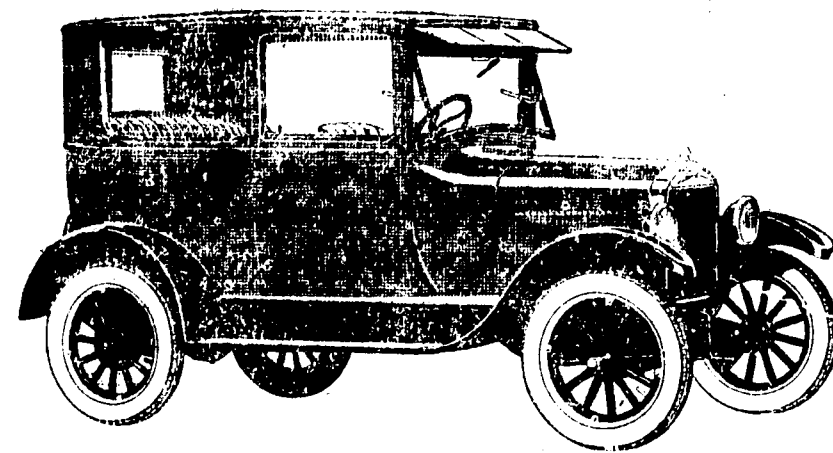

I. D. McAfee

Purebred Stock Raisers Win Diplomas

By Associated Press:

College youths are not the only ones working for degrees these days.

The livestock grower who agrees to use purebred sires exclusively in raising all classes of animals on his farm is presented by the Department of Agriculture and state agricultural colleges with a diploma emblematic of his interest in the "Better Sires-Better Stock" educational campaign.

In addition, he is given a lithographed farm sign resembling a metal tablet which he is authorized to display.

Realizing that wide spread use of inferior male breeding animals has been for many years a cause of low production per animal and of needlessly poor quality, the department launched the "Better Sires-Better Stock" campaign eight years ago as one of several plans to bring about increased efficiency in the production of meats and dairy and poultry commodities.

Corsicana Club Woman Tells of Pioneer Days

The following, which appeared in Sunday's issue of the Dallas News, with a picture of Mrs. Fleming, will be read with interest by her numerous Corsicana friends:

Early days in Navarro county, when the handful of settlers at Dresden, near Corsicana, were in daily fear of attacks by roving bands of Indians and Mexicans and the little outpost looked forward each week to the arrival of the stage coach with its copies of the Galveston News, then a weekly paper and the only one which came into the hands of the pioneers,

Special emphasis was placed on the improvement of purebred male breeding stock for the reason that a male has a great many more progeny than the average female, the ratio being approximately 20 to 1 for most classes of livestock.

A total of 17,063 growers had enrolled in the campaign up to April 1. Animals, exclusive of fowls, undergoing improvement, totaled 571,620; poultry, 1,290,066; states in which participants resided, 46; counties having 100 or more participants, 44; counties free from grade and scrub bulls, one.

As a direct result of the campaign, Union County, Ky., is entirely free of grade and scrub bulls, while Oldham county, of the same state, in which more than 250 persons are enrolled, boosted its annual income more than \$100,000 through greater production of purebred cattle.

The campaign is administered by the Bureau of Animal Industry in cooperation with extension workers of the department and the various states, livestock breeders

were recounted Tuesday by Mrs. Fred Fleming of Corsicana.

Mrs. Fleming is known as a club leader, not only in Texas, but through the United States. She was one of the signers of the charter for the Texas Federation of Women's Clubs, which was organized in 1897 at Waco, and served as its tenth president in 1915-17. Mrs. Fleming has also been a leader in club work in Oklahoma and California, and has served on committees of the General Federation of Women's Clubs. She is now recording secretary for the Texas Federation of Women's Clubs and is a candidate for reelection at the 1927 convention, which will be held next November in El Paso.

"The first paper I remember was the Galveston News," said Mrs. Fleming. "We looked forward to its arrival each week. Delivery service was very poor and the paper was often delayed, while the

mail stage traveled slowly over the trails to Dresden.

"Of course, later, when The Dallas News was established, we discontinued taking the Galveston News and The Dallas News became our family paper."

"In those days we did not throw papers away when we had finished reading them, but filed them carefully away for future reference. My father, D. B. Hartzell, and my grandfather, Jacob Hartzell, were pioneer merchants, cotton planters and cotton buyers. They watched the paper carefully for the cotton market and dry goods reports. Many of the old papers are stored away in our family records.

"The make-up of the paper in those days was, of course, much different from that of the modern newspaper. If I remember correctly, there was no society page, and pictures were a rarity. My mother and I used to amuse ourselves by searching the papers to find the various styles of type. My mother, who is now 87 and living in Dresden, used to read the editorials to me, and we were all very much interested in them.

"The paper was never sensational, and I can not recall a single murder case or other news of a sensational nature that was given any prominence.

"There were many advertisements, and we read them carefully. The impression got about that stores which advertised extensively were the wealthiest concerns, and a store was rated according to the size and frequency of its advertisements.

"Many wood cuts of steamships were published, but there were few photographs. Local opinion was a prime issue in the news columns, and State politics filled many columns."

Delivered by Stage Coach.

In 1872, the date of Mrs. Fleming's earliest recollections, the newspaper and mail were all delivered by stage coach. Later, when the Houston & Texas Central Railroad was built, the newspapers came by train from Houston to the then terminus of the line, and were carried the rest of the way to Dresden by coach. The Houston & Texas Central was several years in building and the terminus of the road was at various points between Houston and Dallas.

Mrs. Fleming's grandparents, Mr. and Mrs. Jacob Hartzell, came to Dresden from Illinois in 1830. At that time Dresden consisted of a few scattered Indian huts, and was the only post office in Navarro county. D. B. Hartzell became a candidate for the State Legislature on a platform which opposed national banking systems and was elected.

The Galveston News was then published by A. H. Belo & Co. This company in 1885 established The Dallas Morning News, the first issue appearing on Oct. 1, 1885. Mrs. Fleming said that her family has been a subscriber of one or the other of the two papers for more than fifty-five years. She is now visiting her daughter and son-in-law, Mr. and Mrs. J. T. Elliot of 3221 Potomac street, Highland Park.

Fort Worth - Construction of pipeline from Nocona field connecting with helium plant here to start soon.

"LAY OF THE HEN" TO BE PRESENTED AT CHAMBER COMMERCE

WILL BE OF MUCH INTEREST AND BENEFIT TO POULTRY RAISERS OF COUNTY

Modern poultry methods presented under a new guise and from a refreshing angle characterize the four act play, "The Lay of the Hen," which will be given at the Chamber of Commerce on Wednesday night for the poultry raisers of Navarro county.

Professor Glazener, former poultry specialist of the A. & M. Extension Service, plays the leading role and will be assisted by several others. Scientific feeding to further egg production is the central theme in the little play but there is sufficient clever comedy to make the four acts purely entertaining as well as educational.

This play has been presented at a number of Texas points and has drawn good crowds in each instance. It is being presented here by the Navarro County Poultry Association and the Chamber of Commerce, co-operating with the Purina Mills.

A special invitation is extended to farmers and their wives to be present. The play will start at 7:30 p. m. in order to be over early for the convenience of those who come from the country. No admission will be charged.

AFRAID TO EAT

Bloating Spells, from Indigestion, Put an Oklahoma Man in a Miserable Fix; But He Found Relief.

Swink, Okla.—In describing how he suffered from indigestion, Mr. S. T. Strain, of this place, says:

"I have been a user of Black-Draught for four or five years. I have been taking it for stomach trouble. I suffered after eating with bloating and a tight feeling. I had spells when I could not eat much of anything. I had severe headaches. I would be nauseated and hurt a lot. I was in a pretty bad fix."

"I began taking Black-Draught. It seemed to help me wonderfully. I didn't find anything that benefited me as Black-Draught did. I certainly recommend it."

"There were times when I just did without anything to eat until I was too weak to go. I was just miserable, and when I ate, my system seemed clogged."

"I had very severe headaches. So I didn't know just what to do. I new I couldn't work if I didn't eat. I seemed like when I spit up was bitter as could be. I took Black-Draught pretty regularly and got where I could eat, and I don't have to take it so regularly now." NC-177

Thedford's BLACK-DRAUGHT Purely Vegetable

HINTS FOR FARM AND HOME

Furnished by the DEPARTMENT OF AGRICULTURE

By Associated Press: Multiplication of weevils within sacks of stored corn can be minimized by fumigation or by running the grain through a fanning mill occasionally, thus warming the weather the more frequent the treatment.

The loblolly pine, known also as the old field and short leaf pine, is one of the South's greatest natural resources. It does well on lands too poor for other crops, grows faster than most other kind of trees, yields good profit and provides timber of an easily marketable type.

The National Forests of the East and South contain some five billion board feet of saw timber, 500,000 cords of tan bark, 50,000 telephone poles, 4,000,000 railroad ties, and an unestimated volume of fuel wood and miscellaneous products.

Hog cholera is most readily prevented and controlled by immunizing susceptible animals with anti-hog-cholera serum, either alone or in combination with hog cholera virus. The latter is usually preferable because it gives lasting immunity.

Colts that have been properly handled and trained do not develop bad habits, such as balkiness or kicking. The most common cause of balking is punishment to make horses do something they cannot do or do not understand how to do.

An ideal place to store bags of grain is a slatted crib lined with galvanized wire having one-quarter inch meshes.

Pine timberland on the farm, well set with trees and properly protected from fire, means an asset of increasing value.

Treatment of the soil with lime or acid phosphate, especially where the chickens kill off the grass, is a good practice.

Hollandaise sauce combines particularly well with asparagus and is a good way of serving eggs when they are plentiful.

"Corsicana Has It."

FORMER CORSICANA WOMAN PASSES AWAY WAXAHACHIE TODAY

The families of Mr. Wm. Clark, son, Sr., and Mrs. Annie Beale have received the message of the death of Mrs. Lizzie Talley Gulick which occurred this morning in the home of her niece, Mrs. Kenner at Waxahachie.

Mrs. Gulick, having lived for many years in our midst, is known and beloved by the entire citizenship of Corsicana. She was a noble product of a christian home, her father, Rev. J. W. Talley, being one of the pioneers of Methodism in Georgia and later in Texas. Her mother sharing in this service, which an influence for good and devotion to the cause of Christ that was continued in the life of Mrs. Gulick. She was one of those sweet influences in the community that took an attitude of love and kindness toward every one and who had in return the love and confidence of all who knew her.

She possessed rare intelligence and with the many christian graces of character that fitted her to the position of an instructor in the Sunday school and maintained a private school here some years ago.

Thus her influence abides in the lives of many who came in daily contact with her.

Her marriage to Dr. J. W. Gulick, brought about a happy relationship as she became a devoted wife, and mother to the children in this home.

Their love and appreciation of her has never been evidenced not only through the years of her active interest, but when the weight of years enfeebled her activities, her tender care and thought attentions have been bestowed upon her in a manner attesting a beautiful devotion and tribute of love. Bishop S. R. Hay and Mr. Wm. Clark, Sr., sharing with the daughters their admiration for her, held a place of affection in her heart alike that of real sons.

Much of the time in recent years she has spent in the home of Mrs. Annie Beale.

The pieces with whom she made her home from time to time, who survive her are, Mrs. Zetta Kenner of Waxahachie, Mrs. W. K. Stewart of Grapevine, Mrs. Charles Church and Mrs. Wallace of Beaumont, Mrs. Lee Boyd of Kerens and a nephew, Mr. Charles Morse of Waxahachie.

The funeral services will be held here tomorrow, Tuesday morning by Dr. F. P. Culver from the First Methodist church at 10:30.

The active pallbearers will be Tom Kenner, Eugene Kenner, W. K. Stewart, Charles T. Morse, Ozro Cheaphinen, J. L. Halbert.

Exports And Waste Before Cooperatives

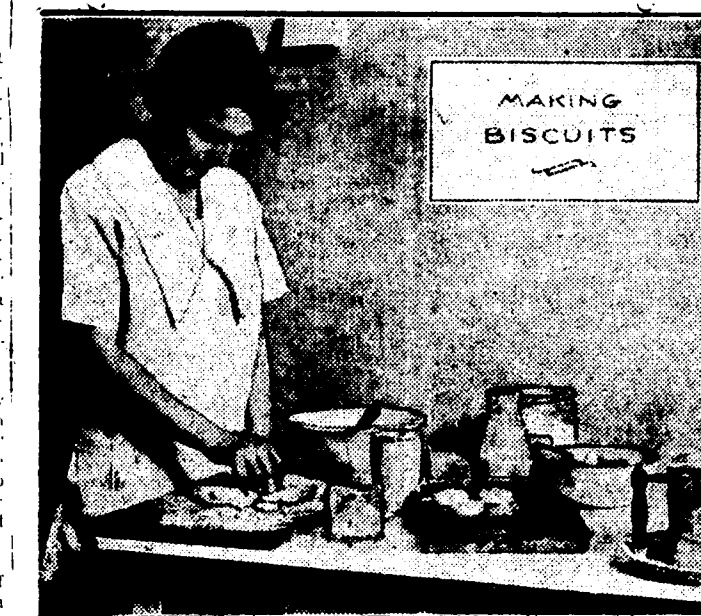

By Associated Press: Waste elimination and export markets will be considered during the week of July 11-16 by leaders of cooperative associations marketing perishable fruits and vegetables and eggs and poultry, who will meet at Chicago for the closing sessions of the American Institute of Cooperation.

Government economists and spokesmen for the farm organizations will take part in the discussions.

Outlook Good For World Wheat Crop

By Associated Press: The outlook for next year's wheat crop throughout the world continues favorable, says the Federal Bureau of Agricultural Economics. The countries that have reported estimate increased area and the conditions of the growing crops are generally average or better, except in India.

BISCUITS HANDLED LIGHTLY

By Associated Press:

Rolling pins are flattening instruments, but if modern housewives want to turn out biscuits "like mother used to make" they must ease up on the muscles, cultivate deft fingers and handle the dough as little as possible.

So says the Bureau of Home Economics, which has issued this standard recipe:

One cup milk, three cups sifted soft-wheat flour, four to six tablespoons fat, four teaspoons baking powder, one teaspoon salt.

Mix and sift dry ingredients together. Work fat in with tips of fingers, then add liquid. Fat may

be cut into flour with knives to avoid warming or handling the mixture too much, but the fingers may be used if you work quickly.

Either milk or water may be used, the quantity varying to obtain the kind of biscuit desired. If sour milk is used instead of sweet, a scant half teaspoon of soda is necessary to neutralize acid of one cup of sour milk. Two teaspoons of baking powder are then omitted.

Bake biscuits in shallow pan or on baking sheet, ungreased, except for drop biscuits. Oven should be very hot, and if electric table is available biscuits may be baked at the dining room table.

URGES BETTER DISTRIBUTION OF CHURCHES

C. J. GALPIN

By Associated Press: Churches of all denominations should get behind a strong rural church movement to correct over-churching in some communities and under-churching in others, declares C. J. Galpin, head of the division of farm population and rural life of the Agricultural Department.

Pointing out that the movement of population is from the country to the city and that farmers stand out distinctly as a family group, Galpin feels that rural churches must be more equitably distributed and efficiently organized if the church is to succeed in adapting those moving to urban centers and maintaining the family touch, its strongest element.

Latest estimates show that the farm population decreased 650,000 persons last year. A total of 2,155,000 persons moved from farms to cities, but this figure was cut down by the migration of more than a million persons from cities to the country and a natural farm increase of 371,000 persons.

Cleanliness Keeps Eggs For 20 Years

By Associated Press: Hertford, Eng.—Dr. C. E. Shelly of this town has a lot of good eggs which he has kept so long that he regards them as antiques and has given up all idea of ever eating them.

In 1907 Dr. Shelly started to test the ancient legend that hen's eggs laid on Good Friday would remain fresh for an entire year. No preservatives were used.

"It is supposed that it was a reward for the crowing of the cock that roused St. Peter's conscience the eggs laid on Good Friday would keep for 12 months," said Dr. Shelly. "I found, however, that not only Good Friday eggs, but those laid on any other day would keep, and not only for a year, but for 20."

"I still have some which I have kept for this long period, and although they are now so dated up that they resemble lumps of burnt sulphur, they are quite fit for food."

In the legend it was stipulated that the eggs must be absolutely clean.

"This is the soundest advice that could be given," said the physician. "For dirty eggs would very soon be contaminated by bacteria. I kept the eggs in a cardboard box in a room which in summer is flooded with sunlight."

FOR WORKING PEOPLE

The best of workers get out of sorts when the liver fails to act. They feel languid, half-sick, "blue" and discouraged and think they are getting lazy. Neglect of these symptoms might result in a sick spell, therefore the sensible course is to take a dose or two of Herbine. It is just the medicine needed to purify and restore the vim and ambition of health. Price 60c. Sold by Lee Drug Company.

Fine Feet Bring Fine Service, Biologists Say About Horses

By Associated Press:

To get the utmost service out of those horses which have survived the machine period, see that their feet are trimmed "on the level" once a month, says the Biological Survey.

Proper attention to this particular, it adds, makes a horse more serviceable by preventing needless strain on the tendons, deformity of the feet and legs, unsoundness and improper action. Normal positions of the legs, the survey declares, are made possible by trimming the feet so that the body weight is uniformly distributed over all four legs.

It is essential to start trimming the feet when the horse is young. In leveling, the survey says, it should be remembered that the hoof grows faster in the toe than in the heel. Normal angles for fore pasterns are 45 degrees and for back pasterns, 50 degrees.

When removing surplus portions of the hoof, the survey suggests that generally it is best to lower the heel first. A knife, rasp and pinners are needed for a proper trimming, and the advice is that the knife should never be used on the bars of frog. Ragged portions of the frog may be removed with pinners.

If the foot being trimmed has been shod, an indication of what portions need most attention can be obtained from studying the wear of the cast off shoe. Horses that are allowed to run and work bare footed should have the edges of the hoof rounded off with the rasp to prevent chipping and cracking. The hoof grows faster in the toe than in the heel, says the expert.

Gypsy Moth's Westward March Halted in Hudson River Valley

By Associated Press:

Albany, N. Y.—The gypsy moth, long examined for egg masses, has met its match in Henry L. McIntyre of the New York State Conservation Department.

When the dread pest crossed the moths like clustered crystals, New York-New England boundary lines on which the caterpillars are in 1922, McIntyre was delegated to feeding are sprayed with high stop its westward march. His campaign, however, nose. Men shod with pain brought the moth to a halting place in the Hudson Valley by foot looking for egg clumps states have been saved from a taster.

plague which New England has been fighting since shortly after our war and in its adult stage will attack any tree, deciduous or the Civil War.

The moth first appeared in this country in 1868 when colonies from Europe were discovered near Boston. For a number of years it appeared sporadically in eastern Massachusetts. By 1905 it was moving west at an annual advance rate of six miles. New England spent \$2,000,000 in its insect fight against the voracious larvae, and lost uncounted millions through the destruction of forests, fruit and shade trees.

The state of New York acted promptly when the moth reached its eastern boundary. With the cooperation of Federal, state and Canadian entomologist and foresters, McIntyre mapped out a barrier zone of 8,000 square miles, from Long Island to Canada and from the Hudson and Lake Champlain to the New England border. In this territory the battle has been waged with crescent, sprays and painstaking inspection of countless square miles of woodland.

Almost literally, no stone has been left unturned in this war of extermination. When a colony of moths is found many acres of the

surrounding countryside are notified.

Alaskan Deer Brought Nearer U. S. Market

By Associated Press:

An important aid in the development of the reindeer industry in Alaska is seen by Will C. Barnum of the Federal Forest Service, opening of public lands in the territory to grazing under government permit.

Throwing open of these lands for this purpose, he says, will result in a better supervision of reindeer grazing and transfer of the herds from the far north to points of shipment nearer the United States.

CHICHESTERS PILLS

THE DIAMOND BRAND. Ladies! Ask your Druggist for Chichester's Diamond Brand Pills. They are the most reliable and most effective pills ever made. They are sold by druggists everywhere.

SOLD BY DRUGGISTS EVERYWHERE

Excursion Every Saturday

FROM

Dallas, Corsicana and Waco

TO RIO GRANDE VALLEY, POINT ISABELLE, BROWNSVILLE AND MATAMORIS, MEX., returning Tuesday. Very low rate for round trip including all necessary expenses.

Wonderful opportunities will be offered to buy lots in POINT ISABELLE, the Valley's new deep water harbor, and play-ground, and in LAS EBANOS, Brownsville's Million-Dollar Restricted Residential Addition, at the same price and on the same terms at which Valley people are buying them so rapidly.

Will also offer irrigated farms, in small or large tracts, improved and unimproved near Brownsville, San Benito and Mercedes on much easier terms and at about one-half the price at which they were formerly sold to excursionists from Northern States. The largest land company in the Valley has authorized me to clean up their entire land holdings in the Valley and about twelve thousand acres of fine cotton land in McMullen County at these greatly reduced prices and every liberal terms. Over one and a quarter million dollars of these lots and lands have been sold from the company Brownsville office since January 1st, 1927. The opportunity of your life is offered to acquire a home in the most prosperous and healthy country in the U. S. A. and in America's greatest Winter Garden and in the coming citrus fruit country of the world.

Thoughtful and intelligent people are coming to the Valley from everywhere.

Only a little time and expense and you can see for yourself — "Seeing is believing."

Further information cheerfully furnished. Call on, phone or write—

COMMISSIONERS HEAR ROAD MATTER MONDAY MORNINGS'S SESSION

KERENS ASKS AID ON CERTAIN HIGHWAY; BOND ISSUE FUNDS DISCUSSED

At the regular meeting of the commissioners' court Monday morning, a delegation of Kerens citizens headed by E. E. Nettles, petitioned the court to furnish dynamite to blast out stumps in a road from Kerens east along the railroad, and a delegation of good roads committee-men also appeared relative to certain rumors about the spending of the money of the proposed bond issue in the event that it is successful at the election June 4.

The delegation from Kerens pointed out that the road had been purchased by private subscription for \$1,500 and that the Texas Power and Light Company had agreed to furnish the material for the building of two bridges, one over Daniel's Lake and the other over Trinity river and the Kerens citizens would do the work. It was pointed out that between 800 and 1,000 pounds of dynamite would be necessary and the court was asked to purchase same.

The court stated that county had not designated the road and could not spend monies except on a public road. Warranty deeds to the road were tendered the court. Indications were that the court would not accept the same unless a provision is made to the effect that the court will take the road after the building of the bridges.

The matter was deferred until the afternoon session when it was scheduled to be considered again.

The good roads committee-men, headed by C. L. Jester, appeared before the court and reported that there were considerable rumors to the effect that the commissioners' court might change the designations or appropriations in the proposed bond issue which will be voted in Consolidated Road District No. 1, June 4, in the sum of \$2,690,000.

It was pointed out by both the committee-men and members of the court that the monies appropriated as set out in the petition could not be changed by the commissioners should they desire to do so. It was also pointed out that in the event that the State and Federal Highway Departments wanted to change the designation of the cardinal highways in this county, there is still enough monies appropriated from the county funds to construct a nine-foot road. The petition sets out monies for a nine-foot concrete road on the main cardinal and it is expected that the State and Federal Departments will furnish the remainder necessary to make it an 18-foot road.

The opinion was voiced by Judge

Hicks that the State and Federal Highway Departments would keep the present location of the roads wherever practicable should the issue carry.

C. H. DeLafosse declared that in his opinion, the road would keep the present alignment in the Embouse territory, where the rumors are said to be heard, due to the situation in Ellis county, where a good road has been built and much money spent in making the present road. He declared that Ellis county would not spend additional monies to build another road to the county line when they had one road already.

Commissioner Megarity and the other three commissioners declared that wherever the roads had been designated, the monies would have to be spent there, whether the commissioners wanted it there or not.

TORNADOES STRIKE GARLAND AND OTHER TOWNS; SEVERAL DIE

(Continued From Page 1.)

killed in a tornado which struck Garland, 15 miles northeast of here, and Nevada, 35 miles northeast, early today. About forty are reported injured.

The storm hit the residence section of Garland about 2:30 a. m. and a few minutes later roared through Nevada. Eight were killed in Garland, and latest reports state there are two dead at Nevada.

The known dead at Garland: CHARLES SMILEY, railroad section hand.

MRS. CHARLES SMILEY.

LILLITH SMILEY, their daughter, aged 10.

MISS EMMA BRIDGES, 18.

MONROE TODD, 35, hardware clerk.

"GRANDMA" NICHOLSON, 78.

MR. AND MRS. C. R. McLEOD, EVA BRIGGS.

MRS. MONROE TODD.

Two others, unidentified, are reported dead at Garland. About 15 of the more seriously injured were brought to Dallas hospitals.

Among the more seriously injured here are:

Margaret Smiley, aged 4, not expected to live.

D. E. Nicholson, 37.

Mamie Bridges, 14.

W. B. Corley, 67.

Mrs. M. A. Blair.

Mr. and Mrs. S. E. Nicholson.

Mattie Louise Nicholson, 7.

Greta Smiley, 10, and two other children of Mr. and Mrs. Charles Smiley.

Buck Corley.

Mrs. Buck Corley.

Mrs. E. D. Spillers.

Nevada Tornado Meagre.

Reports on the Nevada storm were very meagre early today. All wires into the town were down, and information on the damage came from residents who drove to nearby towns to send messages.

A railroad telegrapher at Wylie told the Associated Press there were two dead at Nevada, and that his information came from R. A. Taylor, 10 miles away, to send messages.

The tornado demolished the portion of Nevada.

A residence section of Garland here the brunt of the wind, about 15 houses being demolished.

Mrs. Todd did not know her husband had been killed and at the hospital here she continually called for him. Mrs. M. A. Blair, 71, who nurses children in Garland, had a broken hip, wrenched back and was not expected to survive.

Way Die or Way to Hospital.

Mr. and Mrs. McLeod died on the way to the hospital. The McLeod house caved in on the occupants, crushing them as they slept. McLeod was dead as the ambulance arrived here, and his wife died before she could be taken to the operating room.

Mrs. C. A. Carmichael of Nodona, who was visiting her father-in-law, W. D. Carmichael, said the Carmichael house was twisted from its foundations and blown over. Mr. Carmichael suffered a broken right leg and deep cuts on the head and body.

Reports of the dead at Nevada ranged all the way from 2 to 20.

Storm Passes High Over Dallas.

The storm passed over Dallas but too high in the air to do much damage. Torrents of rain, accompanied by hail, fell here. It came on the first anniversary of the great hailstorm which caused \$2,000,000 property damage here. Just a year ago hail the size of baseballs shattered hundreds of plate glass windows, tore holes through roofs and perforated automobiles tops.

High water prevented newspaper men and relief parties from reaching Nevada from Dallas. Streams overflowing their banks in all directions.

Newspaper men tried to get through by wrapping rain coats around the engine of their machine, but it finally stalled in the water, and they turned back to Dallas.

Garland Tornado Claims Several Victims

By Associated Press.

Garland, Texas, May 9.—Seven or eight persons were reported killed, and a score or more injured by a tornado which struck part of the residence section of this town of about 2,000 persons between 3 and 4 o'clock this morning. Two hours after the storm four bodies had been recovered and 14 injured had been sent in ambulances to Dallas, 15 miles distant.

The known killed were Monroe Todd, Mr. and Mrs. C. Smiley and "Grandma" Nicholson, mother of S. E. Nicholson. Relief workers said they were sure the death list would reach seven or eight, and a number of persons were unaccounted for. The more seriously hurt were being sent to Dallas for treatment.

Trapped in Beds.

The dead and injured all were trapped in their beds, as few only were up. Some estimates of the injured place the number as high as 40 to 50.

Among the more seriously hurt sent to Dallas were the four Smiley children whose parents were killed.

The tornado struck between 3 and 4 o'clock and followed several hours of heavy thunder showers and gusty winds, and some of the unhurt or only slightly injured

were said by neighbors to owe their escapes to having been aroused and being uneasy.

A man and his wife escaped injury by running from their home and dropping into a small ditch nearby. The man saw his house swept away as he raised his head above the edge of the depression. The tornado struck only a few square blocks of the residence section. It extended from the northwest corner of the public square about five blocks westward coming out of the northwest.

Houses Demolished.

Some ten or fifteen houses were entirely demolished, in a few instances every bit of timber being swept from the lots on which they stood. Other structures had the roofs taken off, a dwelling here and there had one side cut cleanly away, and one or two of the smaller dwellings were picked up bodily and dropped a block or more away from their original location.

The storm crippled the light and telephone systems and placed the damaged section entirely in the dark. Lack of lights made rescue and relief work slow until daylight, as it had to be conducted under the rays of oil lanterns and flash lights.

As daylight came hundreds of residents stood around and viewed the ruins, talked in awed tones of this or that friend who was missing, inquired about others, and sloshed through the mud and water as they walked to see the points where the force of the wind was greatest.

Ambulances From Dallas.

Ambulances quickly reached the scene from Dallas when word went there for help, and by daylight a long string of them stood in readiness to take the injured to hospitals.

Among the injured here are: Mrs. Little Spillers, 35; Mrs. M. A. Blair, 71; Mrs. Monroe Todd, 30; Mrs. S. E. Nicholson, 37.

After passing through here the wind apparently went northeastward, as telephone communication in that direction was destroyed.

Vague reports of the damage done to towns northeast of here were received but lacked confirmation. Rockwall in Rockwall county was isolated early today so far as telephone communication was concerned.

Four Killed Near Wolfe City Monday

By Associated Press.

Greenville, Texas, May 9.—Four persons were killed near Wolfe City about 20 miles north of here, and two were killed, near Kellogg, seven miles north of this city, by a tornado between 2 and 3 o'clock this morning.

Mr. and Mrs. George Stidham, and one child were killed instantly, and another of the Stidham child, who was injured, received when their home near Wolfe City was wrecked.

The wind near Kellogg demolished the home of Mr. and Mrs. Lackey. Mrs. Lackey was killed in the wreckage and her husband died just before noon.

Charles Cale of near Floyd was injured in a storm which hit there.

Sixteen Known Dead In Nevada Tornado

By Associated Press.

Nevada, Texas, May 9.—Sixteen persons, fourteen of whom were white, and two negroes, were killed and 28 are known to have been injured by a tornado which struck this town of 800 population about 3 a. m. today.

Some of the injured are expected to die. Practically the entire business district of the town, including 15 brick structures, was destroyed. The Old Fellows' Hall was about the only building left standing. The First Baptist church and the Methodist church were among the buildings damaged. The Baptist church, however, was intact enough to permit it being converted into a temporary hospital.

The list of dead:

MRS. R. C. EVANS, 22.

MRS. J. T. LEVANS, 45.

MRS. R. B. CRAFT, 65.

INFANT OF WILL VAUGHN.

MISS PAULINE MARTIN, 15.

J. R. ROBINSON, 64.

J. D. COPE, 66.

GLADYS LEMONS, 12.

MRS. BESSIE TACKETT, two Tackett children.

MRS. J. M. WILSON, 50.

MRS. J. C. JOHNSTON, 60.

MRS. ETTA VAUGHN.

TWO NEGRO CHILDREN.

Telephone communication with the outside world was crippled, and news of the disaster was sent to the Associated Press from a temporarily arranged telephone in a field outside the town.

The damage was estimated at \$250,000.

The more seriously injured were sent to Greenville and McKinney.

IT DRIVES OUT WORMS

The surest sign of worms in children is paleness, lack of interest in play, fretfulness, variable appetite, picking at the nose and sudden starting in sleep. When these symptoms appear it is time to give White's Cream Vermifuge. A few doses drives out worms and puts the little one on the road to health again. White's Cream Vermifuge has a record of fifty years of successful use. Price 35c. Sold by Lee Drug Company.

DRILLER OF FIRST TEXAS OIL WELL TO PROSPECT AGAIN

H. G. Johnston, driller of the first oil well in Texas at Corsicana in 1893, is now preparing to explore a new territory three miles east of Corsicana on the C. L. Jester farm, just off the Kereus road. The derrick has been erected and drillers are now rigging up for the test which will be the Austin chalk, usually found about 1700 feet in that area. Charlie Kessinger, drilling contractor, will drill the well.

The well will probably be spudded in Monday. It is located on the northwest corner of the 72-11, is bounded on the north and west by property belonging to Major Charles H. Mills.

Mr. Johnston drilled his first well in 1886 and has been actively engaged since that time. In this period of 41 years, Mr. Johnston and his associates have drilled wells all over the United States and have built up the largest plant for the manufacturing of oil field machinery in the world, the American Well and Prospecting Company, at Corsicana, a \$2,000,000 plant.

The discovery well was drilled on what is now South Twelfth street opposite the Natatorium. The test was originally planned as a water well and was drilled to a depth of 2400 feet, an extremely deep well at that time. Oil was found at 1050 feet, and was the beginning of the Corsicana field.

The well was drilled with cable tools, but within a few years most of the work in this part of the country was done with a rotary rig, and this method of drilling is still in vogue.

Spindletop, the well that discovered the second great oil field in Texas, was drilled by Jim Hammill for Galey & Guffey in 1903, according to Mr. Johnston. When the parties interested in the Beaumont area decided to drill a well was necessary for them to send to Corsicana for a rotary rig and driller.

Another of the discoveries made by Mr. Johnston and his associates were the Central Kansas salt fields. These wells were drilled from 1886-89.

Discussing the various improvements made in oil field machinery and supplies, Mr. Johnston recalled the days of the old stove-pipe casing, which was made of galvanized iron and was about 18 to 20 inches in diameter. He recalled that when the Rock Island Railroad drilled water wells at the Kansas headquarters, man power was used for all fishing jobs. The wells were about 150 feet deep and when a string of tools was lost, a small man was let down into the well by a rope around his heels, carrying an extra cable to attach to the tools. It was regarded as a common occurrence to use man power for such uses.

In explaining the great growth of the American Well and Prospecting Company, Mr. Johnston attributed the great success to the fact that all of the machinery put out by the plant had been created through the knowledge of the needs of the industry and with the aim of making the machine the most efficient for the work to be done. The plant employs several hundred men and is devoted entirely to drilling machinery.

SURVEY OF COUNTY SHOWS IMPORTATION OF SEED NECESSARY

Navarro County is importing cotton seed to meet pressing planting needs and the available supply of practically all of the farm seeds is short in this county.

This condition was brought out in a hurried survey made by Henry Gentry, county clerk, following a request from C. H. Alvord, Director of A. & M. Extension Service, explaining that the government was seeking an immediate check on all farming counties for available seed to meet the expected demands from the Mississippi flood areas.

Mr. Gentry found that each of the Corsicana cotton oil mills were expecting a car load of seed this week to meet the farmer demands, and that Kereus had also ordered a car load of seed. The only available supply of seed inquiry found on the hurried check was at Barry, and the amount there was not considered a surplus.

No surplus of late varieties of corn or other feed crops was found. There has been considerable replanting in this county.

Navarro County produces its own planting seed, outside of the specialized varieties. J. J. Bryant, the only pedigreed cotton seed breeder in the county, has contracted virtually his entire production to the Farm Bureau.

Mr. Gentry explains the present dearth of available seed has been due largely to the large amount of inferior cotton produced last season and the small amount saved from the smaller cotton by the individual farmers.

NOTHING LIKE IT ON EARTH

The new treatment for torn flesh, cuts, wounds, sores or lacerations that is doing such wonderful work in flesh healing is the Borozone liquid and powder combination treatment. The liquid Borozone is a powerful antiseptic that purifies the wound of all poisons and infectious germs, while the Borozone powder is the great healer. There is nothing like it on earth for speed, safety and efficiency. Price (liquid) 30c. 60c and \$1.20. Powder 30c and 60c. Sold by Lee Drug Company.

METHODISTS ELECT DELEGATES ANNUAL FALL CONFERENCE

At the District Conference which met at Richland Tuesday and Wednesday, the following lay delegates were elected to represent this district at the annual conference which convenes in Fort Worth about November 15:

Judge W. A. Tarver, W. P. Thorpe, Mrs. W. B. Landrum, Mrs. J. S. Callie, Mrs. L. A. McCord, Miss Langford, L. I. Griffin, Mrs. C. C. Albritton, S. W. South, H. Farmer, Mrs. A. W. Hall, Mrs. P. Griffin.

Alternate Delegates—E. B. Dawson, W. W. Plunkett, Noel Hollingsworth, J. L. McCown, J. A. Smith, V. T. Swafford.

The District Board of Lay Activities brought in the following nominations and they were elected:

Judge W. A. Tarver, lay leader; W. A. Hugg, associate lay leader; L. I. Griffin, associate lay leader.

Mrs. J. S. Callie, district secretary of the Woman's Missionary Society, spoke about the progress made in woman's work and appealed to pastors to open the way for the organization of societies in every charge. Her statement that the district made second to best report at the recent annual missionary conference held in Brownsville was received with applause.

Mrs. A. W. Hall, District Sunday School Secretary, discussed her work in a very forceful and enthusiastic manner, special emphasis being laid on teacher training.

Rev. C. O. Boatman spoke on the dual extension work and Cookshury training course.

Dr. F. P. Culver presented the hospital cause and each pastor was asked to observe Mother's Day sending a special offering to Rev. C. Q. Smith, Hospital Commissioner at Fort Worth to be used for the children's ward.

After hearing Caleb Moss, Navarro County Boy Scout Executive, explain his work and some of the things which have been accomplished, the Conference by unanimous vote commended the work both in Navarro and Limestone counties.

Rev. J. D. F. Williams, field secretary of Epworth Leagues, was present and spoke concerning the rapid progress which has been made in this work. All pastor's were urged to organize Leagues and send delegates to the summer assembly at Fort Worth.

Judge W. A. Tarver, after speaking very commendably of Southwestern University at Georgetown, asked the district to pay the expenses of undergraduates to the summer school of theology, and provision was made to do so.

The following resolutions were offered and approved by the Conference:

1. We have marked the busy year, combined with the Christ-like spirit characterizing the work of our presiding elder and his good wife on this district the past five months, not only with interest but profound admiration, as well.

We wish, therefore, to assure them that they have come near winning all hearts in the district already. And we wish further to join you in assuring them of our continued cooperation for the remainder of the Conference year.

2. We, your year members, leave to report very general satisfaction with the cordial hospitality of Bro. Boatman and his fine folk here at Richland for the entire session of this conference.

Resolved, therefore, that this entire body join us in an expression of appreciation of the foregoing abounding hospitality.

M. A. Turner.

Resolved, first, that we are opposed to the use of force or violence in the settling of international disputes.

Second, that we favor the settling of international disputes by arbitration or by international Courts of Justice.

Third, that we favor the application of Jesus' teachings of Brotherhood and Good Will in both national and international affairs.

Fourth, that a copy of these resolutions be sent the Secretary of State at Washington, D. C., a copy to the Daily Sun and Dallas News, and a copy to the Texas Christian Advocate.

REV. JOE I. PATTERSON.

REV. C. O. BOATMAN.

DR. T. S. ARMSTRONG.

DR. F. P. CULVER.

REV. B. R. WAGNER.

The next District Conference will be held at Frost.

ADDITIONAL SUMS ADDED LOCAL RED CROSS RELIEF FUND

Subscriptions to the Corsicana Red Cross relief fund for aid of the victims of the Mississippi Valley floods reached the sum of \$2212.66 Friday at noon, when \$91.75 was received since noon Thursday. A check for \$117.75 was received from Mayor Keitt of Frost as donation from Frost citizens. Subscribers since noon Thursday are:

W. J. McKie\$50.00

F. B. McKie 25.00

Dr. and Mrs. W. F. Harger 5.00

Citizens of Frost (additional) 11.75

Previously reported\$2,120.91

Total to date\$2,212.66

Beaumont—\$1,000,000 new hotel in this place being considered.

CO-OPERATIVE MARKETING PLANS MUST BE WORKED OUT BY FARMERS SAYS JARDINE

NEGRESS ARRESTED FOR THEFT; COUNTY ATTORNEY HAPPY

A negress, Evelyn Susherry, is in the Navarro county jail charged with several cases of theft, among which is one case for the theft of a diamond-platinum watch, the property of Mrs. L. J. Woods, wife of the county attorney. The cases will be presented to the grand jury for investigation when it convenes next.

Deputy Sheriffs Wilkes and Spoor arrested the accused negress Thursday night and lodged her in the county jail for theft but the watch belonging to Mrs. Woods was not missed until Friday night. Saturday morning, the negress confessed to County Attorney Woods that she took his wife's watch and the same was recovered in her personal belongings officers stated.

Another complaint for theft was filed against the negress Saturday in the watch episode.

The negress had worked for several months in town and articles were reported missing from several persons. It was stated.

Attaches of the court house were reminded by this happening of the time during the oil boom when Walter Hayes was sheriff of Navarro county and some one entered the sheriff's office at night and burglarized the desk, securing several dollars cash. However, Mr. Woods had more luck in catching the negress than Sheriff Hayes did the persons burglarizing his office. No arrests were ever secured for the sheriff's office burglary.

MODERN MACHINERY BEING INSTALLED AT KERENS GIN SITE

Special to the Sun.

Kerens, Texas, May 6.—The installation of new gin machinery in the Anderson & McClung gin is well under way, and soon the public will be acquainted with one of the most up-to-date gin plants in this section of the state.

Four men, all of whom are experienced gin operators, have charge of this work, and the interior of this plant is rapidly taking on a different appearance.

When complete there will be housed under its roof a 5-80 Pratt & Whitney gin and a 5-80 Mitchell bulk extractor.

Kerens is already boasting of the best gins in the state, and the improvements in this plant will be received with much enthusiasm by the people in this part of the Sun-ny South.

TO ALL HOLDERS OF SECOND LIBERTY LOAN BONDS

NOTICE OF REDEMPTION

All outstanding Second Liberty Loan 4 per cent bonds of 1927-42 (Second 4's) and all outstanding Second Liberty Loan 4 1/2 per cent bonds of 1927-42 (Second 4 1/2's) are called for redemption on November 15, 1927, pursuant to the terms of the bonds. Interest on all second 4's and second 4 1/2's will cease on said redemption date, November 15, 1927.

Holders of Second 4's and Second 4 1/2's are urged to have the bonds redeemed and paid at par on November 5, 1927. Such holders may, however, advance of November 15, 1927, be afforded the privilege of exchanging all or part of their bonds for other interest-bearing obligations of the United States.

Holders who desire to avail themselves of the exchange privilege, if and when announced, should request their bank or trust company to notify them when information regarding the exchange offering is received.

Further information may be obtained from any Federal Reserve Bank or branch, or from the Commissioner of the Public Debt, Treasury Department, Washington.

A. W. MELLON, Secretary of the Treasury.

Washington, May 9, 1927.

HEMPSTEAD SHERIFF KILLED WHEN AUTO STRIKES SMALL CAR

By Associated Press.

Houston, Texas, May 9.—While funeral arrangements were being made Monday for Sheriff L. M. Moore, 39, of Hempstead, who was killed in an automobile accident near Houston Sunday night, physicians were working to save the life of H. D. Wheeler, Hempstead confectioneer, the sheriff's companion, who may have internal injuries.

Moore's automobile collided with a small coupe driven by a woman on the highway 12 miles from Houston. The sheriff's car turned over several times and pinned him beneath it. Occupants of the coupe were uninjured.

MORE FUNDS FOR RED CROSS FLOOD SUFFERERS TODAY

Local subscriptions to the Red Cross flood relief fund had reached a total of \$3294.66 at noon Saturday, according to a check up at the Daily Sun office, where funds are being received at the request of local Red Cross chairman, the Rev. H. J. Ellis.

Secretary of Commerce Hoover, who is back in the flood area, Saturday stated that the \$10,000,000 requested by the Red Cross would be necessary as well as additional funds, and urges the people to continue to give to the flood sufferers, some 230,000 of whom are now homeless and dependent on the Red Cross for sustenance of life and a place to sleep.

Subscriptions from noon Friday to noon Saturday were as follows:

T. A. Henderson, Richland, \$30.00

Citizens of Barry 25.00

Mrs. J. A. McGee, Rice, 10.00

A. E. Carraway, Rice, 2.00

Miss Lucille Milligan, 5.00

Joe Trimble

CO-ORDINATION IS AIM OF NATION'S COTTON INTERESTS WITH HINES AS ITS HEAD

By CARL S. BRANDEBURY
(Associated Press Staff Writer)
New York, May 9. — King Cotton looks to new empires to conquer.

The cotton textile industry of the United States—a giant of some \$2,000,000,000 invested capital—is working toward this goal under the direction of Walker D. Hines, one-time director general of railroads, who has been drafted to co-ordinate the industry and promote its progress and developments.

As head of the newly organized Textile Institute, Inc.—the latest born in the family of industrial institutes—Hines is applying the same harmonizing agencies that enables him as arbitrator to solve the snarled problems of the waterways and shipping of middle Europe after the World War.

It was this feat of Hines in composing the differences between the allied and former enemy countries and his far reaching responsibilities in operating 250,000 miles of railroad as President Wilson's director general of transportation in the post armistice period that brought the call from the cotton men to head the textile institute. The institute was formed for co-operative efforts along lines that had been employed in iron and steel, meat packing and the copper and brass industries.

Field Survey Started
A field survey marks the initial stage of the Hines campaign that has for its ambitious achievement the co-ordination of the cotton textile industry from the grower down to the disposition of the consuming public. Already Hines has marshaled behind him 484 cotton mill members of the institute which represent more than 21,350,000 spindles or about two-thirds of the active spindles of the country.

Hines has been making close contacts with manufacturers and acquainting himself with the diverse angles of the industry with the view of obtaining a preliminary idea of the existing problems so that he announces he is prepared to shape up his organization. He plans to make a thorough survey of the question of extending the demand for cotton goods by organizing a section on new uses.

The former director general of railroads also intends to make a careful survey of the methods of cost accounting in the various mills that wish to participate in such a study through the selection of expert cost accountants for this work. Statistic, both general and special, are to be assembled and digested and summarized.

All geographical divisions have been broken down in the campaign to establish King Cotton more securely on his throne, Hines said. Members of the American Association of Cotton Manufacturers, whose interests lie in the South, and the National Association of Manufacturers, with its membership in New England, have joined hands in the common cause, as Hines puts it—"a clear ascertainment of the underlying facts as to the extension of uses of cotton goods and as to production, cost and consumption so that every manufacturer may be more fully advised as to the bearings of the general situation upon his individual problems and may reach decisions as to his policies in the light of this more complete information."

Variety Marks Industry
The cotton manufacturing industry is made up of a great variety of different lines of manufacturing, each with its separate problems. It is, therefore, Hines thinks, indispensable in the search of facts to proceed separately as to each of these branches of the industry and he is taking steps to organize the industry into groups for the purpose of developing the necessary information.

Thus the "wide sheetings group" and the "narrow sheetings group" already have been organized and each is taking steps to promote the obtaining of information relating to its own problems and opportunities. Other groups are likely to be formed in the near future and each group will be in a position to utilize the results of research in Hines' office and also avail itself of the initiative and assistance of the other groups.

While the institute is an organization of cotton mills Hines and his executive committee are convinced that it is eminently desirable to work in most friendly effort with every other general interest related to cotton manufacture. Thus the problems that beset the grower, the selling agent, the converter, finisher, garment manufacturer, wholesaler and retailer and the consuming public are to be carefully considered in the Hines plan.

Researches in connection with the production and manufacture of cotton are in progress for the benefit of the industry which employs more people than any other primary manufacturing industry in the United States except steel and iron.

Hines said that the world would be combed for trade information which will be made available to 1,600 cotton cloth mills and others engaged in textile production.

MOTHERS DAY IS OBSERVED SUNDAY FIRST METHODIST

INCREASED ATTENDANCE AT SUNDAY SCHOOL; INTER- ESTING CHURCH SERVICES

There was a total of 716 present at the First Methodist Sunday School yesterday. This compared with 631 last Sunday shows an increase of 112, and compared with an attendance of 592 the same Sunday last year shows an increase of 124.

In the Adult Department Rev. F. P. Culver lead the service with W. S. Burdine leading the singing.

In the Weller Bible Class there was an attendance of 81, 65 regular members and 16 visitors from J. L. Halbert's class. The two classes met jointly and J. L. Halbert taught the class. This attendance compared with 50 last Sunday shows an increase of 15 and compared with an attendance of 33 the same Sunday last year shows an increase of 22 or nearly 100 per cent increase in attendance over last year.

At the morning church hour, Rev. F. P. Culver preached a special Mother's Day sermon. Choir Director Edward F. Hearne sang a solo and the choir sang an anthem.

The church auditorium for the Mother's Day service was packed to capacity with the Sunday School room also crowded. The services were very beautiful and impressive with the Rev. Mr. Culver paying a glowing tribute to mothers.

At the night hour the choir sang an anthem and Dr. C. O. Shugart, who is a member of the training school faculty now under way at the church preached.

Among the announcements made by Rev. Mr. Culver was one to the effect that the Standard Teachers' Training School would start Sunday afternoon and last through Friday night; the regular monthly meeting of the Board of Stewards Monday night at 7:45 in the Educational building, and the fact that no prayer services would be held Wednesday night.

The first session of the training school was held in the Educational building with seven classes and some 100 enrolled Sunday afternoon at 3 o'clock. The school will continue each night through Friday night, starting at 7:30, in the Educational building.

Next Sunday will be observed as Golden Cross Day, both at Sunday School and the church. J. T. Newsom is chairman of this move, which is a society for the hospital of the church, and members will be enrolled both in the Sun-

day School and church next Sunday for this movement.

Prior to the regular morning sermon the little son of Mr. and Mrs. Chas. G. Jester was christened and Mrs. Chas. G. Jester came into the church by letter. There were several others who came into the church by letter at the close of the services.

Flowers were pinned on the coats of the men by the ladies of the church as they entered the church services at the morning hour, red if the mother was living and white if the mother was dead. A handsome Bible for the pulpit, handsomely engraved in gold letters, was presented the church at the morning hour by J. L. Halbert.
